E-DATA

Providing 24/7 access to data, SGS Engage allows for full visibility on sample analysis and analytical results!

COURIER SERVICES

With a regional courier service in the Denver Area and a local full-service lab with PFAS capabilities, we are your local partner for all your environmental needs!

SPECIALTY TESTING

As the originators of method 1633, we offer a wide range of matrices to analyze PFAS compounds in water, soil, sediments, biosolids and tissues/biofluids. We offer a whole suite of PFAS options for all your measurement needs. With rush capacity and multiple locations, we can handle your projects with ease!

NETWORK OF LABORATORY SERVICES

SGS provides reliable and comprehensive environmental analytical testing services including organic and inorganic analysis of water, soil, air, waste characterization, energetics and explosives, and emerging contaminants to industrial, consulting/engineering and government clients in support of Federal and State Environmental Programs. SGS's extensive Federal and State regulatory experience provides clients with the required expertise to assist in the development of analytical protocols and sampling and analysis plans, including IH rental centers and couriers near you.
